

I'm unable to directly edit or convert files. However, I can guide you on how to change bullet points to numbers in a Word document and export it as a PDF:

1. Open the Document: Open your Word document.
2. Select the Bulleted List: Highlight the bulleted list you want to change.
3. Change to Numbered List:
  - Go to the "Home" tab on the ribbon.
  - In the "Paragraph" group, click on the "Numbering" button (it looks like a numbered list).
4. Adjust Numbering if Necessary: If you need to adjust the numbering format, click the small arrow next to the "Numbering" button to choose a different style.
5. Save as PDF:
  - Click on "File" in the top menu.
  - Select "Save As" or "Export" (depending on your version of Word).
  - Choose the location where you want to save the file.
  - In the "Save as type" dropdown, select "PDF"
